

## Educational Units

The map composition presents two sets of data: database of educational units and database of other units.

Database of educational units – a set of spatial data refers to field data of schools and educational establishments and register of real estates being the seats of provincial self-governmental organisational units supervised by the Department of Education and Science of the Marshal Office of the Wielkopolskie Voivodeship.

Database of units – the spatial data set concerns the register of real properties which are the seats of provincial self-government organisational units supervised by the Department of Education and Science of the Marshal Office of the Wielkopolskie Voivodeship.
